

# DEVELOPMENT OF TRAINING CARD VERIFICATION AT PT. MCDERMOTT

Chintya Ainun Ni'mah (3112101012)

## PROBLEM

There is an obstacle every morning before starting work, because the supervisor has to contact the admin to help check the validation of the employee training period one by one.

## THEORITICAL REVIEW

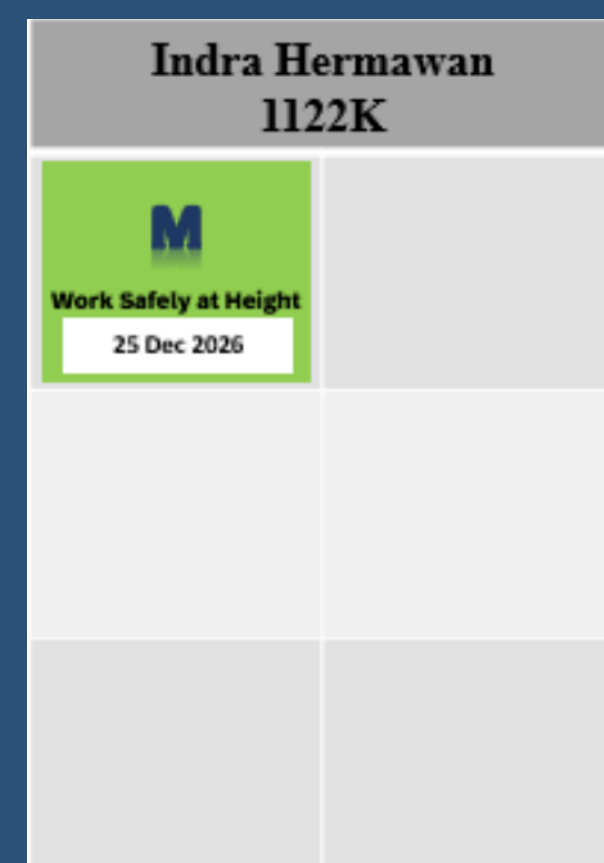

### Development

Development is an educational effort both formal and non-formal that is carried out consciously, planned, directed, organized and responsible in order to introduce, grow, guide and develop a basic personality.

### Training

Training is a systematic process that changes employee behavior to achieve organizational goals.

## OUTPUT

Completed Training Card Verification

## SOLUTION

By making physical recordings in the form of training card verification, it can make it easier for admins not to check the validation of employee training data one by one.
